Election/Restriction

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

I. Claims 24-26, drawn to a method for culturing a mammalian host cell, classified in Class 435, subclass 325.

II. Claim 27, drawn to a method for increasing the sialic acid content of a glycoprotein, classified in Class 435, subclass 69.1.

The inventions are distinct, each from the other because of the following reasons.

The methods of inventions I and II are distinct, each from the other, because they are drawn to processes having materially different process steps, which are practiced for materially different purposes.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their different classifications and recognized divergent subject matter, and the search required for any one of inventions I-II is not required for any one of inventions I-II, restriction for examination purposes as indicated is proper.

Applicant is advised that the response to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Any amendment of inventorship must be accompanied by a diligently-filed petition under 37 C.F.R. § 1.48(b) and by the fee required under 37 C.F.R. § 1.17(h).
